Summary

IT professional with strong skills in software development, systems administration, and networking. Experienced in building web applications (React, Node.js, SQL), cloud platforms (AWS), and Python automation. Proficient in troubleshooting, Agile collaboration, and end-user support.

Experience

Customer Experience / General Merchandise Associate

Oct 2021 – Present

Walmart Canada

St. Catharines, ON

- Maintained data accuracy and resolved system discrepancies using internal databases and tools.
- Collaborated across departments to improve operational workflows and product availability.
- Applied analytical thinking and clear communication to troubleshoot issues under tight deadlines.
- Managed high-volume inventory logistics and stock replenishment for improved store efficiency.
- Delivered exceptional customer service by proactively identifying client needs and resolving complaints, directly contributing to improved store satisfaction scores.

Product Owner & Backend Developer

Jan 2024 – Apr 2024

Shortify (Brock University Capstone)

St. Catharines, ON

- Built backend modules for multi-source content summarization as part of a full-stack React + Flask + PostgreSQL application deployed on an Ubuntu VPS.
- Architected an end-to-end YouTube summarization pipeline featuring automated caption extraction, fault-tolerant audio fallback with yt.dlp, and FFmpeg media processing integrated with AWS Transcribe.
- Developed a sophisticated text extraction engine utilizing Selenium and BeautifulSoup to autonomously navigate, scrape, and sanitize dynamic webpage content for accurate NLP processing.
- Created validation utilities and wrote unit tests with pytest and unittest, mocking APIs to ensure reliability.
